

Since 1932 BOUS has become a specialist in cleaning and degreasing equipment. The range of products includes almost all types of cleaning equipment, such as:

- **Continuous flow cleaning systems**
- **Flood cleaning systems**
- **Spray cleaning systems**
- **Immersion cleaning systems**
- **Ultrasonic cleaning systems**

The material to be washed stems from a wide range of industries. Whether it is rod material, tray goods, bulk goods, tubes with complex geometries or difficult washing material - we have a solution for everything.

BOUS stands for quality at the cutting edge of technology. In addition to the proven standard solutions, we have remained true to one principle in all our developments:

We offer you individual problem solutions from consulting to design and manufacturing to on-site service.

By the way: We, the BOUS company, will solve your problem in practice and would be pleased to invite you to our factory for washing tests.

Quality and experience since 1932

Excerpt from our product portfolio:

CeBeCo® PULSOMAT

Fine scatter cleaning system for interior cleaning

- finest interior cleaning for highest cleaning requirements
- extensive integrated filter system
- simple ergonomic handling
- almost particle-free due to pulsating valve switching

CeBeCo® ROWAMAT® XP

Pipe washing system in continuous cycle process

- for interlinking with sawing centers and end processing systems, as well as stand-alone solution
- with throughput rates of up to 4,800 pcs/hour depending on interlinking and pipe dimension
- with low change over effort
- with an energy-saving drying concept

CeBeCo® DUWAMAT

Cleaning plant in continuous process

- cleaning of set goods or continuous material
- transport via wire belt conveyors, overhead conveyors, chain or roller conveyors
- integration into existing or planned production lines possible

CeBeCo® TROWAMAT® combi

Spray cleaning system with running wheel and flood function

- for cleaning of bulk material, difficult to wash material or pipes with complex geometries
- running wheel control: rotary automatic for bulk material, swivel automatic for sensitive wash material
- strong pump performance enables low detergent use and fast washing times
- retrofitting of ultrasound possible, for particularly fine cleaning results

CeBeCo® ROTIMAT

Spray washing system with turntable

- for cleaning e.g. large-volume and heavy components
- with three-sided nozzle system per medium
- stubborn incrustations and caking can be loosened by using a high-pressure centrifugal pump
- front and top loading and unloading selectable depending on size

Some of the illustrations also show optional equipment that is not included in the standard scope of delivery. The contents correspond to the status (03/23). We reserve the right to make changes to design and equipment. Special equipment shown is available at extra cost.
